# TOW><BRAKE®CJX System

by TOW><BRAKE INTERNATIONAL LTD.  
800-927-6778

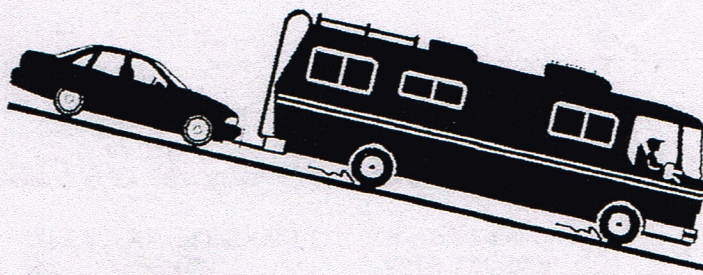

1. Automatic Operation
2. Manual activation
3. Built-In-Breakaway
4. 2 Status lights
5. Audible "Brake-ON" Indicator
6. "Auto-disable" for very steep down-grades
7. Adjustable Sensitivity from Motorhome
8. Precision Pressure Regulator of Pressure applied to Car Brake Pedal
9. Fully Electric operation:
  - a. No Air, Vacuum or Hydraulic Lines, no leaks!
  - b. No modification of Car or Motorhome Brake systems
  - c. Will not void warranties
10. Meets all State and Provincial Towing Regulations
11. Remove system to drive the car in less than a minute

Complete Kit \$679.00

PLUS \$200 Installation

# VP-TOW->BRAKE®

**The FIRST all-electric towed brake system and still the BEST!**

**Air Brakes?  
Hydraulic Brakes?  
Exhaust Brakes?**

**TOW->BRAKE® works on all!  
No special adaptation!**

>> **Electrical**  
Does not modify braking system.  
Will pass State Vehicle Inspections.

>> **Controlled & Monitored**  
Motorhome driver can control & monitor the  
Tow->Brake system.

>> **"Break-Away"**  
Towed vehicle stops automatically in the event  
of a break-away.  
(1 in 25 RVers experience break-aways.)

>> **Fail Safe Status Indicator Lights**  
Towed vehicle braking can be monitored via the  
status indicator lights on the module beside the  
motorhome driver.

>> **Dyna-Matic Safety System**  
Includes the exclusive "brakes hot" warning  
with visual and audible alarm. It guarantees  
**less wear and tear on your brakes!**

>> **Easy to Install**  
System is designed for the handyman  
mechanic to install; no need for a certified brake  
mechanic! Kit includes an illustrated, step by  
step installation manual.

>> **Meets USA & Canadian Requirements**

>> **100 Mile/100% Guarantee!**  
Drive with the Tow->Brake in use for 100 miles  
and if you are not satisfied with it's performance,  
return the product for a full refund.

**Easy to remove to drive  
your towed vehicle!**  
Simply unplug the power, pull  
two pins and set the unit in  
the back seat or trunk. This  
takes less than one minute!

**Electric Actuator  
Mechanism is sealed and  
keeps maintenance simple!**  
No maintenance needed - no  
oiling; Permanent magnet  
motor - no brushes to replace;  
No filters to clog, no fittings to  
leak, no airlines to crack or  
deteriorate AND no air tanks  
to worry about moisture! This  
system is stable and worry  
free; not affected by  
environment! **It does not  
compromise your existing  
brake systems.** No cutting  
brake lines or modifying the  
braking system, tow bar or  
hitch.

**Brake activates in one of Three ways:**  
1) **Automatic Operation** - Works instantly when you need to stop quickly!  
2) **Manual Operation** - You can apply the brake without applying the motorhome brakes for slippery surfaces or  
steep grades for complete control over the system.  
3) **Break-Away Operation** - This feature is engineered into the system. It is not an add-on! It automatically  
applies the brakes to the detached vehicle and they will remain applied until electrically released.

**Non-Invasive - Allows for easy installation and operation:**  
One bracket is bolted to the floor on your towed vehicle "car" and the other bracket is bolted to your brake pedal.  
The rest is just electrical wiring, including mounting the sockets on the motorhome and "car". All the wiring is included  
with the kit to connect from the brake pedal on the "car" to the motorhome driver's control module.
